To empty this pit there are five drainage pumps (5No.) pump No.1-5 mounted in this pit. All the pumps discharge through individual pipes and are designed to allow reverse running during pipe emptying after the pumps stop, so that no valves are required in the discharge lines.

Pumps No.1-4 rated at rated at 58KW and are all mounted at the same level and controlled by level switches mounted at four different levels of the pit. This water is discharged from the water pit located at the turbine floor in to a facility known as tailrace, outside the power house.

Pump No.5 rated at 13.5 KW is mounted at the lowest level of the pit and the primary function of this pump is to completely pump out all water in the pit to allow maintenance of any of the four 58KW pumps.
