KENYA ELECTRICITY GENERATING COMPANY PLC.

KGN-GDD-108-2018.

TENDER FOR PROVISION OF RIG MOVE SERVICES AT THE OLKARIA AND EBURRU GEOTHERMAL FIELDS.

19th December, 2018.

CLARIFICATION NO 1.

In Accordance with the Tender for “Provision of Rig Move Services at the Olkaria and Eburru Geothermal Fields”. KenGen hereby issues **Clarification No.1**

BIDDER'S QUESTION	KENGEN'S RESPONSE
During the site visit, we noted that the movement between Olkaria and Eburru sites will have to be via the main highway and some of the equipment is overweight and cannot be loaded on standard flatbed trailers as per the Kenya national highway (KENHA) regulations. KENHA regulations are very clear in terms of axle load limits, therefore the heavy pkgs will require to be loaded on multi axle lowbeds and the requirement for the lowbeds has not been stipulated under your equipment requirements. Please advise how we should price this?	The bidder shall acquire all the necessary permits required for use of their trailers and trucks through the highway from KENHA. The cost of the permits shall be factored in their price schedules.
Fourteen (14) day completion period between Olakria IV and Eburru field is not possible as this will require additional time or additional number of vehicle due to scope of work and terrain. Kindly advise if	According to KenGen's drilling program, fourteen (14) days is enough to mobilize the rig equipment from the Olkaria IV to Eburru. Bidders can mobilize additional trucks, trailers and other equipment for them to meet the specified period.

the number of days/vehicles can be amended for that particular rig move
